Education

University of Technology Sydney

Bachelor of Engineering (Honours) in Software

January 2017–November 2021

Sub-major in Data Analytics with a focus in Machine Learning

University of Technology Sydney

Diploma in Professional Engineering Practice

January 2017–November 2021

Engineering Capstone

Title: *Software Security Analysis using Deep Learning*

Supervisors: Yulei Sui

Description: The project aim is to develop new techniques to detect and repair software security vulnerabilities for large and real-world software projects by leveraging deep learning and natural language processing.

Experience

GTSGroup

Junior Support Engineer

February 2020–Current

- OSIssoft PI System support for various clients; fixing system issues and performing system health checks.
- Created various ETL Python scripts for clients.
- Designed and developed a program in Python to fetch data from PI System, then publish data to Google Sheets.
- Working in a project team to setup, install and customise PI System for clients.

Veolia Australia and New Zealand

Engineer Undergraduate - Software

January 2019–January 2020

- Developed web scrapers in Python to get weather data and data from meters such as power meters and flow meters into PI System.
- Pre-processing various data forms; csv, excel and json. With Python for ingest into PI System.
- Implemented an email attachment downloader in Python to download files from emails. Saving time for the company as this was done manually by an engineer on a daily basis.
- Systems support for OSIssoft PI System; fixing system issues and enhancing functionality

Veolia Australia and New Zealand

Software Engineering Intern

August 2018– January 2019

- Designed and Developed web application for internal users to input data into PI System using Angular, Node.js and Microsoft SQL Server.
- Systems support for OSIssoft PI System; fixing system issues and enhancing functionality

Coles Roselands

Service Team Member

February 2017– August 2018

- Serving customers, handling money, packing shopping bags and arranging stock on shelves.

Technical Skills

Programming: Python, JavaScript, TypeScript, C, C++, C#, Java, MSSQL, MySQL, HTML, CSS

Frameworks: Angular, React, Node.js, Express.js, Flask, Django, Docker, GCP, Firebase, AWS

Data Science: TensorFlow, Keras, Pandas, Scikit-Learn, NumPy

Tools: Git, GitHub, Travis CI, Excel, Jira, Trello

Systems: OSIssoft PI System(Real-time data management system); PI AF, PI Vision, PI Web API, PI UFL Interface, PI Datalink

Transferable Skills

- Strong **problem solving** skill demonstrated by being a system support engineer. I regularly solve various customer problems relating to systems issues. I have also developed many ETL scripts that solve problems with data ingest to the PI System.
- Ability to work in a **team** and **independently** shown through employment at GTSGroup and Veolia. I have also worked in a variety of teams in the 6 Software Engineering Studios I have completed at university where I got a high distinction mark.
- Strong **communication** and **listening** skills demonstrated through employment at GTSGroup, Veolia and Coles. I communicate through email, phone, online meetings and in person to colleagues and clients.
- **Fast learner** shown by the ability to learn new tools and software quickly. I am constantly learning new software libraries and frameworks at work and university.
- Efficient **time management** shown by completing system support tickets within the resolution time at GTSGroup.
- Ability to **work under pressure** shown by working in a fast paced service environment at Coles.
